Craps is my favorite casino game and this VR version lives up to my expectations. The latest update makes it much easier to rebet/press bets and the new casino environment looks amazing! The developers are very active and they actually listen to what we end users have to say. I'll be purchasing just about any app they come up with...especially add-on games for this casino environment. Download this game now and enjoy having a craps table/casino in the privacy of your own home!. I put in 15 hours during a free weekend, was impressed enough to get the game and all dlc while it was still on sale. Found myself doing the "just one more turn" thing until the wee hours of the morning.. Free if you are an early access player. 10/10. Waste of money, even though I bought it on sale. Stay away, far away from it.. more like grand theft BAD. This is a terrible game, don't waste your time or money. Very simplistic and not fun.. 7 min & 319 tries for 1 puzzle and there are i think a few of it (5 or more). "The Last Warlock" is an entertaining fantasy battle simulation. A cross between Minecraft and Age of Wonders, your character meets other magic-users in the field of battle to see who will be the last, as there "can be only one". To your aid you can conjure multitudinous magical beasts, who if they have arms may wield the weapons and shields you craft for them from raw materials conveniently scattered about. Many of these creatures are mounts that may be ridden into the fray.

Besides the various enemies to slay, the battlefields also feature clever puzzles to solve, and secret treasures to uncover. There are also multiplayer options, to try your mettle against natural intelligence opponents.

A highly enjoyable experience, especially considering the price. If the game had one downside, it would be that the AI is very weak. I have nearly completed the game on Challenging, and only had to redo one map due to the unexpected death of my Warlock.. I've been using this software with SketchUp to quickly put myself in a 3d model. Very easy to use and one of my favorite VR tools.
